Subject: RE: May 29
Importance: High

Background as discussed. I don't think it's helpful to send this around broadly inside and have a debate over whether this warrants an HQ mtg. We have the private parties booked to come and they are expecting a meeting. An HQ mtg is needed to remedy the concern raised by the negative tone in the letter the Region sent out. We need to plan out where we go from sampling plan and how we get to a consent decree(s). We need a process that will involve HQ and the Region to do that. That's the purpose of this discussion. The Portland site is on the Administrator's priority list. The business community expects significant HQ/Administrator's office involvement in figuring out how we move forward as quickly and fairly as possible in conjunction with Chris and Sheryl in the Region. The Meeting Objectives will serve as our thoughts on an agenda. The Key Things are for your background. I think we should probably talk again after you've had the chance to review.

Meeting Objectives:

1. Information Gathering - ask questions and get additional detail/background/information on the March EPA letter and thoughts on path forward
2. Information Sharing - educate EPA on the PCI allocation/post-allocation process and timing
3. Discuss Shared Objectives in the Post PDI Sampling Period
4. Discuss Process/Next Steps - put in place a process for coming up with how best to proceed post-Pre-RD sampling (PDI Work)
5. Status of the PDI Work and Issues Encountered Over The Past Few Weeks
6. Other Issues

Key Things to Consider/Discuss

1. Timing/Sequencing/Multiple Interrelated Work Flows
 - a. PDI Sampling and Evaluation Report - critical path to other items and therefore critical to ensure that have cooperation and timely review during sampling and report phases
 - b. Remedy Design/Development - discussion of integration of PDI data and process path forward
 - c. Allocation/Post-Allocation Process
 - d. RD/RA Negotiations and Consent Decree(s)
 - e. Early Action Projects

2. Important/Critical Variables/Factors
 - a. One versus multiple consent decrees
 - b. Sequencing (both among the different work flows noted above and physically - river/projects)
 - c. Status of Source Control
 - d. Federal PRPs
3. Process
 - a. How can we most effectively engage in a process to determine both what are the right next steps for the pre-RD process and what needs to be done in the interim so that all parties are ready to proceed with those next steps
 - b. Discussion of square pegs trying to fit into round holes - not "regular order" so how do we foster innovative solutions
